

Data and Application Availability Management

DISASTER RECOVERY

• HA CLUSTERING

• DATA PROTECTION

LifeKeeper® for Windows

Key Features:

- Supports all versions of Windows Server 2000 / 2003
- Active/Active and Active/Standby Configurations of up to 32 nodes
- Data can reside on shared SCSI, single-path or multi-path Fibre Channel SAN, iSCSI or on replicated volumes across either a LAN or a WAN
- Automated monitoring, failover and failback of all application and IT infrastructure components
- No requirement that all servers be identically configured
- Simple interface for manual movement of applications between servers to eliminate outages from planned maintenance
- Integrated Data Replication for disk-to-disk backup, shared-nothing clusters or WAN-based disaster recovery
- Out-of-the-box protection of:
 - Network Connections and File Shares
 - IBM DB2 UDB
 - IBM Director
 - Microsoft IIS
 - Microsoft Exchange Server 2000 and 2003
 - Microsoft SQL 7.0 and 2000
 - Oracle 9i Release 2 and 10g
 - SAP Netweaver
 - LifeKeeper Extender lets you easily incorporate protection for any application

The SteelEye LifeKeeper family of data replication, high availability clustering and disaster recovery solutions enable enterprises of all sizes to ensure continuous availability of business-critical applications, data and supporting IT infrastructure. SteelEye LifeKeeper for Windows offers enterprise-grade reliability while simplifying implementation with certified and easy-to-deploy solutions for a wide range of applications and databases running on all flavors of Windows 2000 and Windows 2003 including Standard, Advanced, Enterprise, and Datacenter versions.

SteelEye LifeKeeper provides fault-resilience for the most demanding enterprise deployments at a low cost by supporting configurations built on commodity servers and storage and by removing the need to make application environment changes. LifeKeeper delivers advanced monitoring of servers, networks, operating systems, applications and data along with automated healing capabilities based on policies set by system administrators to ensure that applications and data are always available. LifeKeeper for Windows is ideal in environments that run mission critical database and messaging operations and is today protecting Exchange, Oracle, IIS and SQL Server in major corporations world-wide. As customers look to deploy enterprise applications on Windows, they can be assured of the high availability benefits of LifeKeeper for Windows across the spectrum of Intel-compatible platforms.

Supporting the widest range of server and storage configurations from simple LAN clusters to clusters across a Fibre Channel SAN to shared-nothing clusters built around data replication, LifeKeeper lets you deploy the solution that best meets recovery time objectives today while allowing for expansion in the future. With support for both Linux and Windows and the ability to manage both environments from a single console, LifeKeeper can protect the entire IT infrastructure regardless of platform.

With over 4,000 licenses installed in companies of all sizes world-wide, LifeKeeper has established itself as the gold-standard for High Availability Clustering, Data Replication and Disaster Recovery.

About SteelEye Technology®

SteelEye is a leading provider of data protection and application availability solutions for business continuity and disaster recovery on Linux and Windows. The SteelEye LifeKeeper family of software products enable enterprises of all sizes to ensure continuous availability of business-critical applications and data on industry standard servers and storage systems. SteelEye software products are available worldwide and may be purchased directly from SteelEye or through the SteelEye international network of business partners.
